

Tiny M.

Interest of Things

→ Embedded systems

micro-controller,
sensors, actuators.

eg:- ~~planting~~ ~~trans~~ plants watering system

→ gravelmeter → if dry
→ if water
→ else

wait for any.

program.

some conditions programmed.

→ Soil moisture sensor

with
p.p.

mini computers

Schedulen

10 plants.

Smart phone

water plants

check their
status

DL

Software Hardware

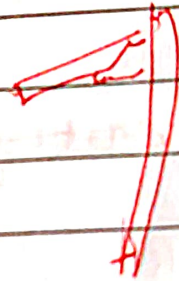

Smart Agriculture

Interest

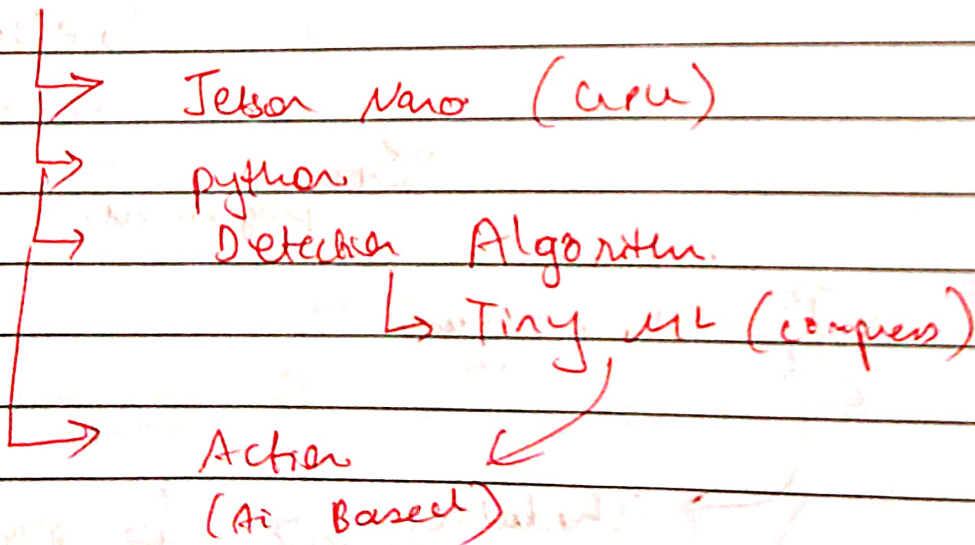

Interest of

mini-computers, can program hardware operations
& we can make these hardware operations
dynamic.

eg. Case Study $\rightarrow$ Leopard detector (Alert)

Detect + Alert

Tiny ML is nothing
but compression of ML model

Code example
